

ifa group of companies at the ESCRS

This year's ESCRS Winter Meeting was hosted in the "golden city" of Prague. In the congress centre of Prague's Hilton Hotel small booths created an atmosphere of privacy and familiarity, which perfectly reflected the exhibition's meaning for the eye care industry:

The ifa group of companies took this opportunity for intense and stimulating conversations with a major part of the 450 participants who had registered for the congress. In the relaxed atmosphere of the exhibition, interesting ideas were vividly exchanged at the ifa booth: top refractive and cataract surgeons informed the ifa team about their upcoming Health IT projects while decisions were made with ifa's longstanding partners from the eye care industry to further intensify cooperation, too.

All in all 2012's ESCRS Winter Meeting confirmed the great renown that ifa's solutions in the areas of EMR, ecPACS, Telemedicine and Electronic Data Capture for clinical studies enjoy at international level.

After all it is through highly developed solutions for the entry of structured, meaningful data that the ifa group's applications support well-directed acquisition, processing and analysis of meaningful ophthalmic data sets for clinical studies, which has become an increasingly important subject to the ESCRS's visitors for carrying out their work.

Thanking all visitors for the many interesting conversations at our booth, we look forward to meeting you again soon.

Great success for the ifa team in Orlando

At the AAO (American Academy for Ophthalmology) Annual Meeting in Orlando, the ifa team received overwhelming feedback from the market. Professional ifa EMR consultants performed over 400 consultations, generating a tremendous amount of leads for new EMR projects in the US and worldwide. The ifa team also qualified for the IHE (Integrating the Healthcare Enterprise) implementation process and presented its professional connectivity solutions at the AAO "Electronic Office" pavilion. The ifa connectivity suite provides the complete range of **HL7 and DICOM** functionality and connection to 450+ instruments and systems.

The ifa team offers the only ophthalmic-specific EMR solution on the market with every important qualification and certification for professional Health IT solutions in ophthalmology:

- Compliance with all 22 "essential" and "desirable" EMR criteria identified by the AAO (American Academy for Ophthalmology)
- ONC (US Office of the National Coordinator for Health IT) certification for the EHR stimulus program
- IHE Eye Care approval (coordinated by the AAO)
- ISO 9001:2008 quality management certification

Dr. Darwin Liao on ifa EMR for ophthalmology

The following interview was held at the 2010 meeting of the American Academy of Ophthalmology in Chicago. Dr. Darwin Liao is an AAO-speaker for IT-related topics and has used the ifa system for over 10 years.

ISO-Certification documents ifa's high level of quality management

The ifa team is proud to announce that ifa systems AG has attained the ISO certification for internal quality management. With ISO's DIN EN 9001:2008 certification, ifa systems has proven the quality of its processes, reflecting a proven commitment to provide a range of ophthalmic and optometric EMR solutions that enhance the satisfaction of all ifa customers.

ISO (International Organization for Standardization) is a non-governmental organization and the world's largest developer and overseer of international business standards. With certification in ISO's quality management standards, all future and current customers -- totaling over 10,000 eye care professionals worldwide -- can be assured of the ifa team's dedication to consistently provide EMR solutions of the utmost excellence, as well as to continually improve those solutions to meet and exceed every customer's requirements.

This ISO certification, coupled with the [ifa guarantees](#) to provide the most connected and customizable ophthalmic EMR systems available in the market today, make ifa the clear choice for all ophthalmic and optometric EMR solutions.
